The Fifa 22 Cracked Version Vision Engine Vectoring Vectoring is used in FIFA 22 to boost ball physics and graphics and improve player interaction. A combination of player models, ball physics and player interaction data is used to make sports such as soccer, basketball and volleyball feel more realistic. New Visual Effects in FIFA 22 WarmUp. Unlike previous FIFA titles, FIFA 22 introduces a new greeting animation that greets players as they join a new team. The animation loops through a pre-recorded collection of animations with sound effects, making the whole sequence feel more welcoming. Ball Physics. The ball physics in FIFA 22 makes for a more responsive and accurate ball movement. The speed of the player controls the trajectory of the ball so that each player can steer the ball in a realistic way. New AI Behavior. The AI in FIFA 22 is smarter and smarter, the developers tell us, so that, for example, if a player is one-on-one with an opponent, the AI will not distract him and step in to take the ball away. AI Chemistry. The AI in FIFA 22 forms more teamwork-friendly partnerships. The AI has learned how to play more intelligently, taking into account both the players involved and the effect on the goal and the scoreboard, so now your favorite players are more likely to put their heads together and work toward a common goal. New Referee AI. There's more situational awareness in the referee as he comes to a decision in an intense game. The new referee AI holds more stable lines and makes decisions more quickly. It will also have the ability to use the ref whistle in a more correct way. New Skill Functionality. Skilled players in FIFA 22 will now have more control over their games than ever before. Players can now take more precise and controlled touches, similar to how players would in real life. In addition, tricks and goals will be far more realistic, and players will have the control over each move. New Player Skill Functionality. Player skill will be more realistic in FIFA 22, with players being able to shoot more accurately with the ball at their feet. An evolved player model is the basis for the player skill you'll see in FIFA 22. There will be more realistic animations and modeling to help players aim, catch, pass, dribble and shoot accurately. Player Animation. Players in FIFA 22 will now move more naturally, bringing the
