## **What's new in Fifa 22:**

- **The new My Career allows you to create a Pro in the new FUT mode which is like an interactive version of FIFA Career in the regular game.**

**FIFA 22 introduces “HyperMotion Technology,” which uses motion capture data collected from 22 real-life players playing a complete, high-intensity football match in motion capture suits.**

- **A number of small improvements have been made to FIFA Ultimate Team, and we’ve been listening to feedback from both long-time FUT players and newer players alike. We’ve given priority to adjusting as many aspects of the game as possible so you won’t have to devote as much time to routine maintenance tasks like bot fixing.**

**The new My Career mode allows you to create a Pro in FUT.**

**We’ve extended the life cycle of all FUT packs, which means you can use them for longer after they are introduced.**

**We’ve made several changes to icons and player cards to make them more consistent between different kit manufacturers. This will make your task of crafting the perfect team more fun as you can now see more consistently which brand of kit is used by a particular player.**

**We’ve added a new type of off-ball action to the game. This helps to break down the opposition’s defensive shape and either helps the attacking team take advantage of poor positioning, or can open up space on the ball so that it can be played into.**

**The camera is also more responsive and will continue to follow the action regardless of how far the ball travels from the defenders. This means that defenders won’t get cut out by the ball so easily. This change makes the game feel faster, more**

**intense and players feel less tiring.**

**Developer comments:**

- **We designed the new Player Created Mode to recreate the experience of playing as a coach. Players can make choices that will not impact their Franchise Career and focus purely on improving their skills.**
