Biology, New York, NY, USA,.Category Archives: Global Interdependence “Globally we must acknowledge the inevitable connection of the “virtual and the real” to the ongoing crisis, the refusal to accept it and its gradual decline, the rise of the beggar and the philosopher, the end of art and the nightmare of progress.” “The question of global interdependence and the money economy is inseparable, as is the “virtual and real”. Global interdependence and the money economy means the concentration of capital and private property.” “Three writers at the very beginning of the century explored the problems of global interdependence. Jameson asked what defines a catastrophe, and for the first time there were writers who were looking at this question – and the consequences – in terms that weren’t covered by the existing orthodoxies of the time. A few, like Jameson, thought in terms of working-class politics. But, beginning with a revisionist Russian Marxist work, the Frankfurt School, looking at postmodernism and personalised cultural expressions of despair, the critique of the market became more and more
