2022**

In this book,

---

"Photoshop" is used as the term for all Photoshop editions, including the consumer-grade Photoshop Elements. In this book, Photoshop is used primarily to create raster images. The

---

raster format is typically used to create print and Web images. But with Photoshop you can also create vector graphics for print and other applications. This book also includes tips and techniques for using

---

Photoshop to create  
vector graphics.

Discover the basics of  
creating raster images.  
Photoshop is made up of  
tools that enable you to  
create and alter raster  
images. The chapters in  
this book introduce you

---

to the basics of working with the tools that enable you to create and edit raster images with ease. From here, you can use the familiar tools to create standard effects such as gradients, shadows, and

---

highlights. Also featured are filters and transforms. These tools can be used in combination to create more advanced effects. This book also looks at elements and objects in Photoshop and how you

---

can use these elements to build more realistic-looking raster images. The chapter on texture maps goes beyond the basics to show you how to apply the power of textures to your work. Photoshop also has tools

---

to enable you to create and alter vector graphics. This chapter introduces these tools and shows you how to create both illustrative and photo-based vector graphics. The chapters in this book focus on one

---

type of workflow:  
creating raster images.  
However, you can find  
similar workflows for the  
other type of images —  
creating vector graphics.  
You also can find similar  
workflows for working  
with both types of

---

images. Finally, this book addresses multimedia workflows for both raster and vector images. This particular workflow is not what Photoshop was designed for — not even close — but it can be

---

very useful, and this book can help you get started. ## Fooling Around With Tools Photoshop is loaded with tools, and you have almost endless ways to manipulate the image you are working on. In

---

this section, you see a few tools that are commonly used by beginning users.

Paul Elliott Paul A. Elliott  
is a New York prosecutor  
whose work has  
appeared on television  
and in the media.

---

Professional life Elliott has been a prosecutor with the New York City Criminal Court for over ten years and is currently a Senior Assistant District Attorney in the New York County District

---

Attorney's office. He graduated from the University of Colorado in 1989 and received his law degree from Brooklyn Law School in 1993. Elliott served as a trial attorney in the U.S. Attorney's Office,

---

located in the Southern District of New York in the litigation units. He has prosecuted hundreds of cases including a high-profile racketeering case against the Gambino crime family, the

---

Acreage Crop Production case, and a \$65 million asbestos case against United Technologies Corporation. At a time when subpoenas are issued almost on a daily basis in the United States, the Department

---

of Justice worked to cut back on the number of nuisance subpoenas issued by state grand juries and arrested more than 1,000 targets connected to a nationwide campaign against companies that

---

engage in price fixing and other antitrust violations. Elliott was hired to prosecute the Acreage crop production case which included some of the largest civil fraud allegations in New York State history. The

---

case was initially prosecuted by the local office, but with the appointment of Elliott as chief of the case, the number of defendants charged with crimes climbed to more than 200 with the potential of

---

more than \$1 billion in fines. As a result of the case's complexity, Elliott filed requests in New York State Supreme Court for the appointment of four committees and an advisory jury to assist

---

him in the investigation and prosecution of the case. This innovative use of the New York Criminal Court system led to the creation of a whole new system of jury trials and punishments for criminal

---

offenses. This system has now been recognized as a model across the country and has led to similar models being created in other states. In addition to prosecuting cases before the New York

---

State Supreme Court, Elliott has also prosecuted cases in the United States District Court for the Southern District of New York (SDNY). In this capacity, Elliott has prosecuted more than 50 anti-trust

---

actions, and 50 suits brought under the federal Racketeer Influenced and Corrupt Organizations (RICO) Act and the federal False Claims Act. This includes prosecuting some of the largest cases brought

---

before Judge Colleen  
McMahon including RICO  
actions against the  
Gambino crime family,  
the office of the New  
York City Commissioner
