CorelDRAW Graphics Suite CorelDRAW, like Photoshop, is a raster based image-editing program. CorelDRAW is a fairly complex program. Use this program if you want to make very highly detailed design images for architecture and interiors. Again, CorelDRAW uses a layered file format. It's very similar to Photoshop, meaning that you can create a new document based on an image or a design that you've created. You can keep multiple layers active and manipulate them to create anything

Q: How to debug and alter the Bootstrap 4 column system? So I am trying to find a way to alter the bootstrap 4 column system so that it has a custom number of rows per section, in my particular case, my data can only take a whole row of 60 per section. I can't seem to find a way to do this at all in the documentation and I can't find a way to alter this directly in the source. I would need some help or a pointer in the right direction to get this done. My question is, is there a way I can customize the number of rows per section for each col in a given row, and if so how? A: I was able to accomplish what I needed, though the main solution I've found is to use this rule for the main column .col-sm-9 { width: 8.33%; } This way I can get a large 8.33% wide column, and then I can use other code to put a small 60px wide row between every 6th and 7th of that column. Q: Passing optional parameters to a component that needs parent binding Given a component like this: I want to create a component that works like so: Since the component instance is not bound to the form, I need to be able to pass an optional argument to the component constructor. My first attempt (as described in SO: Passing optional param to component) is: angular.module('components') .component('avatar', { templateUrl: "url", controller: ['$log', function ($log) { this.$log = $log; this.price = this.parent.config.price? this.parent.config.price : "free"; }] }); A plain {{price}} in the template doesn't work. If I write it as {{config.price}} then it does. I am doing this because I am trying to conditionally show a message with an image (which is wrapped in

Sentinel: Taking a Stand for the Humorless, the Milk-Covered, and the Not So Different Thursday, October 26, 2006 New Photo - The Anti-Photoshop A.D.D. is Born! I haven't been blogging much recently. I've been doing a lot of "real work" and, to be honest, it's been fun, but I've been very busy. I'm working on a "behind the scenes" book about my photography. The book is a collection of images I took and are in the process of being retouched. The photos in the book will have a very different feel than the ones you've seen here for many years. The photos will be rougher, the edges a little wonky, the quality far superior than I have been able to achieve here. The best way to describe the difference is: First, there will be NO KITONAL STREAKS! I have a wonderful artist who is great at painting, but I can't walk a dog or even brush a cat - which means I had

better do all the painting myself. I know there's a LOT of art that's created digitally and I have no issue with that - in fact, I love the challenge of creating something a little different every time. But before I can even think about trying my hand at digital art, I had to master Photoshop - and I'm better off without Photoshop in my life, thank you very much. I have zero patience with learning, and I'm as clumsy as a rhino up a steep hill. I do have "tricks" though, some of which I learned in a full-on Photoshop class, some of which I learned by learning the mouse gestures on my computer. Many of the tools Photoshop provides are too important to go without, so I wanted to explore the ones I'm most comfortable with. The ones I use every day: Adobe Photoshop ($70 per year from Adobe Creative Suite, not including Lightroom) Adobe Camera Raw ($60 per year from Creative Suite, not including Lightroom) Adobe Bridge ($70 per year from Creative Suite, not including Lightroom) Adobe Fireworks ($100 per year from Creative Suite, not including Lightroom) Adobe Dreamweaver ($100 per year from Creative Suite, not including Lightroom) Adobe Illustrator ($100 per year from Creative Suite, not including
