This technology allows us to have a much deeper understanding of the impact of player attributes and player positioning on the AI. We even taught the system how to assess players from a distance by analyzing how they move and communicate with the ball. We've also developed a more intelligent player animation system. World class creator systems The game also introduces an improved match editor, with more social, training, and gameplay features. It includes a Head-to-Head Coaches Mode and a new Chalkboard which we will bring to you closer to the final release. The procedural goal system is also reworked, with much improved goal celebrations and more contextual options. For example, if your team is in a penalty shootout then we'll try to avoid goals like that if possible. The goalkeepers are also a lot smarter; when we're watching a match and we see a keeper has been beaten we'll know how likely that's going to be to happen when the match is played in real life. This improved goalkeeping system means we can more accurately fine-tune the game-balance based on real-world-teams and the situations they're in. We've also added new goal-recovery mechanics, including a penalty system where we calculate the angle of every shot and are able to recover more goals from attempts missed by the shooter. These are just some of the new features added to FIFA 22 which have been a major focus of our development team. We're also making a series of new changes to the playing experience with a revamp of the new Player Update system we're introducing for our games. So as always, we'll be developing FIFA on the run, fine-tuning the game to be the best football game it can be and setting our sights on delivering the ultimate football experience. As you can see, we're focused on using all the tools at our disposal to refine and improve on what we've already achieved. Plus, we're getting more into the development of FIFA on new platforms - PlayStation 4, Xbox One, and the Switch - that are delivering a whole new audience of players to our games. And we're hoping our fans in the West will like what we've got planned for FIFA in a year's time. Is there a relationship between narcolepsy and
