Hierarchical and flat versus planar structured PCL/gelatin scaffolds for bone regeneration: an in vitro study. The aim of this study was to compare two different topography of the polymer composite (PCL/gelatin) on its physicochemical and biological properties. The surface of the composite was prepared by coprecipitation and electrostatic induction techniques. The topography of the modified composite was characterized by X-ray diffraction (XRD), scanning electron microscopy (SEM), energy dispersive X-ray analysis (EDX), and contact angle measurements. Two different seeding compositions were used in vitro to evaluate the influence of scaffold topography on cell functions and viability.

What's new in Fifa 22:

- **FIFA 22 introduces Laudrupball, the Davidssonstajande metod invironnade bollackning, which spans three approaches to development. The first is Fotbollsberättelsen 25-en [FIFA 22 Diggil 7]. The second is Fotbollsberättelsen 25-en [FIFA 22 Diggil 3]. And the third is Fotbollsberättelsen 5-en Övning [FIFA 22 Diggil 2]. These in-depth analyses will give players more insight into player decisions and performances. Note: You can switch into Laudrupball and see the different detailed analysis of every player in the team with just**

- one match.
- **Creating the ideal Player Experience isn't quite as easy in FIFA 22 as it was with the creation of the Legend of the Nations World Cup team in the regionals. New gameplay mechanics have been introduced to re-engineer the creation process, recreating the emotional qualities of elite play and removing the complications of previous versions such as delays due to manage transactions.**
 - **Online now in FIFA 22. The addition of offline Seasons ensures that seasons are also shared when playing offline. This means you can see what your team is doing after playing versus other users.**
 - **Unlock Progression in career mode for all Skill Ratings, in order to save progress and unlock further progress when players progress to a higher Skill Rating.**
 - **A revamped crowd system has been added to live solo leagues. The new organisation of the crowds has a number of significant changes. Namely, the introduction of tournament highlighting matches in the lower divisions. This means that if one of the 3v3 matches for premier cup comes during a defined period of a league match, the tournament stadiums will be highlighted in the lead up to the match. But the biggest change is the way the crowds behave in club matches. The goal of the crowds in club matches is no longer the team in question. Instead they have been changed to represent the passionate fans who come to support their team at each stadium. Club matches no longer have 18-passivity. Instead it's up to the individual player to decide how they want to play the engagement of the crowd. This new dynamic brings**

additional depth and personality to the league settings of FIFA Online.

The FIFA experience starts with the ball. FIFA's many authentic touches will have fans connecting to the game in new ways, and players will be able to master a wide range of new controls. More control over the ball, better positioning, and new touches provide new ways to play, giving players a greater understanding of what it takes to be a master in FIFA. Incorporate The Basics with Controlled Precision Performers on the ball can now use low touches to change direction. With low touches, players can change direction while moving at high speed and make precise, fine adjustments. Players can also perform up-field and then immediately reverse direction by tilting the ball. With more options to control the way players move, pressing the control sticks quickly no longer has a speed advantage over players moving using only touch. Use the intensity of the player's movement to make better decisions and move the ball towards open spaces. Adjust The Strength Of Defense Another key to success is the ability to control the defensive line. Defenders have more physical tools at their disposal to disrupt and stop attacks and there are now more defensive options available when defending a corner. Holders can now use the physicality of the sweeper to direct the ball, while other players can step into the space with runs and passes. We've also reduced the standard playpen for attackers, making it easier to progress the ball and maintain possession in tight spaces.

Read and Play Like Real Footballers
Stay connected to the game with new eyes on the pitch for big moments. Slow down the game in any mode and really see what's happening on the pitch, from how your individual teammates perform to big stories between your own opponents and opponents teams. With a new ball physics model and a new intuitive ball physics system, every player will feel much more connected to the ball. With more subtle tweaks to beveling and ball surface properties, every touch, shot and pass will feel new and give the game a much more authentic feel. Influencers have been upgraded to work like footy stars. For the first time, stars will now impact decisions on the pitch and throughout your career. Making it more important than ever to perform, you'll need to get the ball where you want it - on goals, spot-on corners and just outside the box. Build a career from the off, and you'll have the tools to succeed and build
