The primary new feature of “HyperMotion Technology” is the “Engine Catchphrase.” There are three Engine Catchphrases in the game: “Never Stop Running,” “Just Keep Playing” and “Every Man for Themselves.” These phrases are variations of the phrase “the engine is hungry,” which is the key battle cry at kickoff in FIFA. “HyperMotion Technology” is “a combination of the physics engine, game mechanics and motion capture data,” noted Weitekamp, who added that he thinks it’s the best feature in the game. “I call it a combination of the ‘physics engine’ and ‘game mechanics.’ I’d been looking for ways to add energy into the game, and it came up with the most interesting way to do it.” To

I’d say that FIFA 20’s Pajiba plays are the ones that feature the most real-life team balance. While Real Madrid is more balanced than many teams in the game, the Pajiba is the one that looks the most balanced and plays the most like a real-life team,” he continued.

"When I saw that Real Madrid had this really, really fast defense team, I thought it was cool. We wanted to develop it a bit, so we thought what would happen if we went faster?" Weitekamp added that "while we have the real-life team, we didn't want them to be boring. We did want Real Madrid's defensive skills to be brutal. They
