This past summer, I assisted in the launch of our residency model in North Carolina. In this model, the cost of the residency is not a barrier to allow all the necessary exams and procedures to be done. The cost is an investment, but a smart investment. The cost of the residency acts as an incentive and drive for excellence in residency training. The investment in this model lies in the post-graduate support. The model allows several of the primary care practice partners to match with a resident for continuity of care for their patient base. The care teams in North Carolina are thriving. The model is not only producing excellence in medical care, but most importantly, improvement in the financial stability of the care team. Currently, I am looking for a residency in South Carolina which is the second model. A South Carolina residency would connect with the South Carolina primary care and specialty network. I will be on a residency in a network where its possible to be paired with a physician in a private practice and an academic practice. I will be working with the rest of the residency to put together a model which will be implemented in several other states. We are also talking to multiple residency programs to create a national model. The goal of this model is to decrease the cost of residency training while taking advantage of the care network in the state that the residency exists in. I know there are many others who have great ideas and would love to implement these ideas as well. If you are interested in being a part of the leadership team in this model, please email me. I will keep you posted on how we are getting the ball rolling in several states. Advertisements Share this: Like this: LikeLoading... Q: How to get the path to the HTML rendered by AngularJS and put it in Javascript? I have a simple site that I display pages from it. In every page i have an element that displays a preview of image from file: Now I need to get the path to the image from my server. How do I do that? When I'm viewing page on browser, I see this I've tried to look up this src value on page and got that it's in the style but when I copy the url and try to write it in the src, it doesn't works because it's wrong and I have to fix it. A: You should decode the src attribute of tag to get that encoded fragment. Then you should decode the src attribute on your code. Convert both fragments: `fragmentString = fragment.replace(/%[a-fA-F0-9]{2}/g, '%25$&')` `decoded = decodeURIComponent(fragmentString);` Code: `var fragment = this.container[0].querySelector('img').getAttribute('src');` `var decoded = decodeURIComponent(fragment);` So now you can have decoded that src, and you are good to go. Q: Characteristic function of sum of a set of independent random variables Let X_1, X_2, \dots, X_n be non-negative, independent and identically distributed random variables. I want to show that $\mathbb{E}[e^{\sum_{k=1}^n X_k}] = \mathbb{E}[e^{X_1}] \mathbb{E}[e^{X_2}] \dots \mathbb{E}[e^{X_n}]$ In other words I need to show that $\mathbb{E}[e^{tS}] = \mathbb{E}[e^{tX_1}]$
