Features Key:

- New Player A.I.* High accuracy predictive movements of players are now a reality - players read the ball, determine its direction, and choose how to react with constant tracking of their players. The more tactics a player employs, the more advanced your AI version will become.

-
- The big question is, what will the best player in the world do when they see the ball?
- New defensive behaviour and goalkeeping Get closer to goal than ever before, but save more often: Position-based saves, where you make judgements about how to stop a shot based on where you are and what angle is presented at the moment.
 - New Ride-Em-High celebration Get into the most outrageous celebrations with exclusive new celebrations. Ride-Em-High is an off-the-legs celebration that involves players on all fours as they take off completely in the air. When combined with a special move, players can perform a Cut-Throat Volley.
 - Ultimate Team system with more than 1 million cards to collect Your Ultimate Team will be given extra depth with an ultra-realistic inventory system that supports realistic trading and upgrading; the effects of card acquisition and discarding on your player profiles; and, with our new card mechanics, opportunities to surpass humanly-possible marks.
 - Leading Pass Plus – passes use the touchline. Take the ball down by the touchline, and the pass will lead the way into the penalty area. This will decrease the likelihood of interceptions and errors, and raise your rating in both accuracy and precisions. But at what price?
