Gigaget (Updated 2022)

ACID File Recovery Software combines a recovery wizard, a powerful file search tool, and data search window to help you recover deleted or lost files from your computer. The software uses an innovative new technology called ACID (Advance File Intelligent Data) technology to help you find your files even when all other conventional methods have failed. ACID is the most powerful file search technology currently available. File Recovery Software recovers files from storage devices, laptops, cell phones, memory cards, memory sticks, and USB drives. With this practical yet powerful tool you can recover even files that have been deleted or overwritten! You can search your files by name and date, and can even recover lost files just a few seconds after they are deleted. The intuitive interface displays a simple tree structure of your files on the left-hand side. The title of the program is 'File Recovery Software', but it can also recover memory cards as well as USB drives and other storage devices including HDD and SSD drives. The recovery wizard and database can help you recover deleted files even if you have no access to the storage devices including drives and memory sticks. If you have lost or deleted all documents, you should not worry about finding them, because all of your files will be recovered using ACID Technology. You can perform ACID File Recovery even if you have no access to the storage device you want to recover data from. ACID File Recovery Software is designed to help people who lost or accidentally delete files. It even supports external devices, including memory cards, memory sticks, USB drives and even hard disks and so you can recover even lost data that you cannot find with other methods. You can recover the files from memory cards, USB drives and storage devices. The intuitive interface lets you easily browse your file system for files that have been recently deleted. Optionally, you can recover the data from an external hard disk or disk drive that has been formatted or re-partitioned, or even from a hard disk with the NTFS file system. You can also restore the Windows system recovery partitions. Tested with all Windows operating systems such as Windows 7, Windows 8, Windows XP, Windows Vista, and Windows 10. ACID File Recovery Software includes a wizard that will help you recover any kind of file lost during the Windows OS version and the other system partition. You can also recover data if you have re-partitioned the HDD, or if you have lost the system partition or the hidden
