I am new to Ubuntu and my problem is about using a keyboard because it will not turn off after I have used it. Everytime I close my laptop it is left on at the same state as before I opened the laptop. It's like the bluetooth button on the keyboard is pressed and won't turn off. I have tried uninstalling and re-installing the bluetooth driver but nothing worked. Any help would be appreciated. Thanks! A: The bluetooth chip on your laptop may be causing the problem. You can test this by connecting a usb bluetooth dongle. The keyboard should be working fine then. If it does, then your laptop has no problem connecting. If not, then the problem is the laptop. 310 So.2d 343 (1975) Phillip PLEASANT, Plaintiff-Appellee, v. MOBILE INSURANCE COMPANY, Defendant-Appellant. No. 50182. Court of Appeal of Louisiana, Second Circuit. January 30, 1975. Rehearing Denied February 25, 1975. d0c515b9f4
