The group plays its matches in Slovakia from 25 September to 10 November 2019. Teams Notes Matches Times are CEST (UTC+2), as listed by UEFA (local times, if different, are in parentheses). Group C Group C Group C Group C Group C Group C Group C Group C References External links Official EU UEFA website Group CAbsence of catecholamine abnormalities in chronic idiopathic and secondary low-renin hypertension: evidence for an intrinsic factor for essential hypertension. A raised plasma norepinephrine level in essential hypertensive patients is well established, but there are conflicting reports regarding the presence of peripheral or central catecholamine abnormalities in chronic hypertension. Low-renin hypertension is a distinctive form of idiopathic hypertension with pathophysiological features different from those of essential hypertension. The authors compared norepinephrine concentration and sensitivity in essential hypertensives with those in patients with low-renin hypertension and controls. Plasma norepinephrine concentration and sensitivity were evaluated in the hypertensive patients after beta-adrenergic blockade and in normotensive subjects. Twenty-three patients with essential hypertension, nine patients with low-renin hypertension and seven control subjects were studied. The plasma norepinephrine concentration was significantly higher in essential hypertensives compared with normot
