PhotoShop Elements is a version of Photoshop with a reduced set of editing tools and more simplistic interface. (Those of you who prefer to work with more sophisticated tools can trade your version of Photoshop for PhotoShop Elements.) With PhotoShop Elements, you can perform many of the same tasks that require a high-end version of the program — but in a smaller environment where you can keep things simple. I say more about the basics of Photoshop and PhotoShop Elements in Chapter 6. Finding Photoshop and PhotoShop on your computer When you open the program, Photoshop is likely in your Start menu under the Adobe Creative Suite 3 Tools program. It probably follows the other suite programs in the hierarchy that are installed. (See Chapter 2 for information about installing software programs.) To get to PhotoShop, click the Photoshop icon or double-click the main icon in the Applications folder. Then select PhotoShop (or press the Ctrl+F8 key combination) to start it. If you click the Photoshop icon on the Welcome screen and then click Options, you may see a message that says, "Windows needs to check for updates to your Adobe software. Would you like to close the application and download updates?" Click No to close the dialog box and start Photoshop. Note that many Windows security programs scan your computer at intervals and may display a message prompting you to allow them to do so. If you see this message, click OK to allow Photoshop to function normally. Photoshop and the Windows 7 Start screen With the new Windows 7 interface, the main Photoshop icon is on the Start screen. The icons that are visible are the same as those for the desktop Start screen (see Chapter 5). You can change to the desktop (displayed as soon as you click the program icon) and work there, or open any other program from the Start menu and then return to work in Photoshop (or any other program) by clicking the program's icon on the desktop. Press Ctrl+F2 to open the dialog box shown in Figure 1-5. Click the Define Workspace button, and then click the name of a folder to define its icon as your Start screen. That folder icon will appear on the Start screen. **Figure 1-5:** This dialog box offers you a great deal of flexibility in defining a start screen of multiple folders for Photoshop. Photoshop and Windows Vista With the new Windows Vista interface, the main Photoshop icon is on the desktop. You can open

"Every good path through life leads to the sea" - Bertrand Russell I feel lucky to be a coastal dweller - seabirds, seals, wild roses, changing tides and the arrival of summer. I live on the Isle of Wight and have taken up photography on a regular basis. When it comes to photography I like to be inspired by the light, keeping an open mind to what I see and being encouraged by the challenges of capturing interesting imagery. I particularly enjoy taking images of seabirds and wildlife as I find them endlessly fascinating and being in nature connects me with a deeper sense of peace and contentment. Click here to see more images That said, I am not a wildlife or landscape photographer so all my images are best taken in coastal areas or on the Isle of Wight where I am fortunate enough to be able to use the range of beaches, dunes, arable farmland and coastal paths to my advantage. At the moment I am also concentrating on photographing the changing of the moon and new moon nights. This usually takes place on a clear night, after a full moon, and when the moon appears to be at its brightest. So, if you'd like to view any of my images or want some tips on how to take creative images of the moon and Sun, then please do get in touch. Blessing "All things bright and beautiful, All creatures great and small, The roar of the seas, the songs of birds, The flowers that bloom along the shore, Each in its own way is a blessing, Each in its own way is something to be blessed for."Q: php search files of different extensions and compare with word array I'm trying to compare text files but it's not working yet. I have an array $fileExtension which is an array of file extensions, for example "*.txt" I use this array to search other different files by using readfile. $search = searchFile($fileExtension); $fileToCompare = readFile($fileToCompare); if (file_exists($fileToCompare)) { echo 'File found'; } else { echo 'File not found'; } I have found that if $fileToCompare file is smaller than $fileToSearch only the last symbol of $fileToCompare

The Secret to a Happy Marriage So, my wife and I have been married for 19 years and have survived two dogs, a cat, two crazy kids and lots of ups and downs. What has made this relationship so wonderful and has sustained us through all of those years is something we call The Secret to a Happy Marriage. It's a secret because it's truly one of those things you only find out if you've been married long enough. I can't speak for my wife, but here is what I know. The Secret is this: Love your spouse unconditionally. I would even go one step further and say that it's even better if you treat them better, for the simple reason that you've invested your whole life together. Nothing less is acceptable or enough. You want your marriage to be a place of comfort, safety and unconditional love. You want to be happy with someone all the time, no matter what. If your mate is not meeting your expectations, you want to leave, but you want to stay until they meet your standards. My wife and I have a similar definition of the word "love" in our marriage. You don't have to be together all the time to love and support each other. But you do have to love each other. The only person you will ever be closer to than your spouse is your spouse. What does all of this mean? It means your happiness is more important than anything else. Your spouse can be going through a difficult time in their life. They might be stressed or grumpy or even have a bad day. If you're still there, still loving them, no matter what, you will keep growing as a person. You'll become a better person and a better husband and wife. If your spouse is having a bad day and they need a shoulder to cry on, they can just rely on you, and you won't let them down. The Secret to a Happy Marriage means you've done your job as a spouse well. You've been there for your mate. You've been in their shoes, you've cried with them, you've been the good one and you've been the bad one. When you're miserable with your spouse, so is your marriage. It's as simple as that
