Latest Hindi TamilRockers Songs of Tamilrockers 2009. Selective brain cooling in normothermic porcine cardiopulmonary bypass: a pilot study. The microcirculation is one of the main targets of cardiopulmonary bypass (CPB). Our objective was to test the hypothesis that selective brain cooling (SBC) improves microcirculation and neurological outcomes. Normothermic, unmodified CPB was performed in 12 pigs (51.5 ± 6.4 kg). During SBC, intracranial pressure (ICP) was maintained between 20-30 mmHg, cerebral perfusion pressure (CPP) between 50-70 mmHg, and cerebral blood flow was adjusted to preserve baseline cerebral oxygen delivery. A 100-150 ml cerebrospinal fluid (CSF) was aspirated at the conclusion of CPB, and was aspirated once more 1 min after initiation of CPB. Cooling was discontinued during CPB. Baseline mean arterial pressure (MAP) was 62 ± 6 mmHg, and MAP was 59 ± 7 mmHg ($P = 0.16$) post-CPB. The first CSF sample was taken after cerebral desaturation of 29.6 ± 4.3 mmHg and was prior to termination of SBC. The second CSF sample was taken immediately after initiation of CPB, and cerebral desaturation of 45.9 ± 7.0 mmHg was observed. This study was not powered to assess neurological outcomes. SBC was feasible, and resulted in relative hypothermia, with the first CSF sample being approximately 2°C lower than body temperature at the time of CSF withdrawal. Relative hypothermia was not maintained during CPB. Baseline MAP was significantly lower than immediately after initiation of CPB, and decreased over time. SBC was successfully demonstrated, but did not meet our pre-determined criteria for success. The hypothesis that SBC improves microcirculation and neurological outcomes in unmodified CPB is supported by our data. Carousel Introduction Carousel (or carousal, from Latin corpus, body, and salsus, savory) is a circular form of public entertainment which consists of a series of traveling segments or "spaceships" designed to spin

The public management of the military: a case of 'competitive neutrality'? As a result of the American 'Vietnam syndrome', and the more recent 'Iraqi syndrome', the United Kingdom has adopted a very different public management model from that of its American rivals. The British government has delegated much of the management of the armed forces to the public sector. This paper reviews several of the theoretical principles which underpin this model of public management and questions the extent to which the recent policy shift can be said to be consistent with some of the basic precepts of the competitive neutrality doctrine. 10 essential songs to bring back the R&B blues R&B has been in the doldrums for some time. As U.K. pop and '80s revival dominate the charts, one of the few remaining pop stars who have remained idiosyncratic is made of sterner stuff.

Soulman After falling short of the traditional R&B euphoria of the '60s and '70s, and having to content himself with soul-lite material for the casual listener, the 50-year-old British singer-songwriter returns to the genre, of which he is the unquestioned king, with his fourth studio album, Roll On, due early next year. The Roots Yes, the Roots—black America's equivalent of the White Stripes—will still grow ever-denser in their multiracial mix. This quintet from suburban Detroit delivers the lowdown of the eternal influence of black America on the white American teen, and how that has combined to smother urban black R&B itself. Switchblade Symphony Following their debut LP, Infinite Lives, the British all-girl band went on hiatus, only to be revitalized after an 11th-hour regrouping. Their duet "Why," with the English songwriter-songwriter Graham Coxon, appears on his best album since his own classic, 1989's Figure 8. Jennifer Hudson As the nation's top-selling R&B singer, and the new boss of Motown—which is more important than it seems—Hudson retains her artistic and fiscal grip on R&B. Recently, she was at the very pinnacle of her artistic powers, and on top of the musical world. Ludacris In 2001, the deliciously devilish rapper/singer, who called himself
