The Bronchial Challenge: Can We Resolve the Problem? The Bronchial Challenge is a simulator we have developed to provide real-time training for interventional pulmonology (IP) fellows in lower-level bronchoscopy, the maneuver that can most frequently result in life-threatening airway collapse. We developed the Bronchial Challenge using a commercial bronchoscopic system that was modified to allow the trainer to experience the consequences of severe airway collapse in an objective and realistic manner. The Bronchial Challenge system was designed to provide trainees with a realistic experience of lower-level IP maneuvers, including intubation and bronchoalveolar lavage, and it was developed by integrating physiological and physical simulation concepts with real-time video feedback from a commercial endoscopic system. The Bronchial Challenge simulates intubation with the trainer controlling trainees' physical performance and experience. Six scenarios are available with different difficulty levels. Trainees receive feedback after completion of a specific maneuver through video, audio, and visual feedback from the trainer. The Bronchial Challenge can provide trainees with a realistic experience of interventional pulmonary procedures, including intubation, bronchoalveolar lavage, and airway collapse with bronchial trauma. Because of its realism, the Bronchial Challenge has the potential to improve our trainees' confidence, skill, and safety before they receive direct operative experiences. This simulator may also be valuable in preparing trainees to participate in real clinical scenarios.

Liberal Leader Andrew Wilkinson is finally downplaying the leadership rumblings that have existed on his backbench since the Liberal Party lost the 2017 election. In an interview with The Early Edition's Stephen Quinn, the New Westminster-Burnaby MP said he had spoken with Liberal Party president Anna Gainey about his leadership role and she encouraged him to work with the other Liberals and fulfill his responsibilities as leader of the party. "I've sort of been on a bit of a hiatus since the election," he said. "I talked to [Gainey], obviously, for a couple of hours before we all went away and I think it's really, really important, in terms of this leadership process, that all the Liberals are actually supporting each other.
