* **Preloading images:** Save images in the Photoshop JPEG format for quick loading and editing of images. * **Creating documents:** Photoshop creates a new file when you insert an image into your document. You can create a new document each time you insert an image into a document, or import a file into a document. You can name your document by selecting File⇒New and then clicking Browse. You can also use the File⇒Open dialog box to browse for image files you want to add to the current document. * **Brush tool:** The Paintbrush tool creates a new layer where you paint the original image or edit. The Brush tool has many unique features that enable you to creatively alter images. Use the Eraser tool to delete a section of your image and change it. For example, you can create a different design, or print images in a different style, by simply erasing parts of an image. You can also change the brush size and type for a range of diverse effects, such as using one brush for a large-scale image and a smaller brush for fine details. The Brush tool also allows you to select the artwork or type that will show up when you paint. You can apply different brush types for a variety of creative effects, including airbrushing, digital painting, and pen and ink. You can use the Gaussian Blur filter to create a blurred effect, but the brush strokes are more like traces, so the effect becomes more like a watermark. You can use the Gaussian Blur filter as a replacement for the Brush tool if the effect you want isn't available. The Auto-Blend tool enables you to adjust the visibility of layers, similar to using the visibility feature in the Layers panel. Use the Eraser tool to delete a layer, adjust the Opacity of a layer, or make a layer transparent or invisible. The Auto-Blend tool is part of the Paths toolset. You can use the Align Layers and Align Image tools to rearrange and rotate layers or images in an image. These tools also appear in the Layers panel. The Transform tool works with layers. The Auto-Align and Warp tools also work with layers. You can use the Define Brush tool to let you create any new brush types you need. (See Figure 2-10.) Choose the Basic preset or one of the other brush types to load in a

Q: Is there a way to navigate from one fragment to another fragment directly from a Activity? In my application, I have an activity which shows the map and a map fragment inside the activity. Now, if I am in the map fragment, can I jump to the map fragment directly by pressing a button (without going back to the activity and then pressing the button) or do I have to navigate through the activities and then pressing the button to jump to the map fragment? A: If your fragment is an instance of MapFragment you can use: getActivity().getFragmentManager().beginTransaction() .replace(R.id.fragment_container, new MyMapFragment()).commit(); Organic Search Market to Double in 2012 – Report The organic search market is predicted to double by 2013. This is according to a new report. The UK organic search report predicts that the market will grow to be worth more than £1 billion. The market for organic search has grown at a compound annual rate of 37% over the past five years. This is compared to a compound annual rate of 35% for the total search market in the same period. The organic search market can be broken down into two main types, the local search and the product search. Local search, which refers to keywords that bring users to a specific area, is growing twice as fast as product search. Tim Field, the director of the Organic Search Report, says: "At the moment local search is very much an advantage to the retail world. If you look at what retailers are doing online, they are trying to get more localised. "They know that the amount of traffic they get from search engines towards localised areas is higher than they do with national or global searches. They've got to meet demand in the area. It's like a localised version of Google and that's driving a lot of the growth in the market." Organic Search by type The report by Internet Retailing says that the larger category is the product search, which it predicts will double in size to reach £501 million by the end of this year. This is mainly for national or international products. It also includes the local search, which is related to localised product searches, but as Field explains: "It'

Powerful Hurricane Irma Makes Landfall in Caribbean, Threatens Florida (CNN) — Hurricane Irma made landfall near the Puerto Rican port of Guadeloupe early Monday as the most powerful Atlantic storm in decades and warned it could hit the United States as early as the coming week. Irma's top sustained winds, an important measure of potential damage, were clocked at 185 mph (298 kph) as it made its first landfall at around 6 a.m. local time, the National Hurricane Center said. Irma's eye, where its winds are strongest, slammed into the southeast end of the archipelago of the same name and was centered about 30 miles east-northeast of Saint-Pierre. The eye of Hurricane Irma blows spray as it moves over Saint-Thomas in the U.S. Virgin Islands on September 5, 2017. "It's unbelievable," said Dominick Bonaccorso, a local on the island. "It looks like what you see in the movies. It's like something out of a war movie." The death toll from the storm rose to at least eight in the Caribbean, according to local officials. The Caribbean island of Dominica was cut off by road and damage was reported in Guadeloupe and Martinique. In the U.S. Virgin Islands, the governor said it was too early to know the extent of the damage. But the streets of Saint Thomas were flooded and roads were blocked by collapsed houses, and there was extensive damage to the roofs and electrical systems. Some coastal communities in the U.S. Virgin Islands had no power and no running water. Irma was the most powerful Atlantic storm in more than 20 years. For comparison, Hurricane Mitch caused an estimated $20 billion in damage and killed more than 10,000 people in Central America in 1998. Forecasters warned that within 48 hours, Irma could be a Category 5 storm capable of devastating the Leeward Islands, which are further north and had already been hit by Hurricane Irma. Irma roared toward the Abaco Islands on the southeastern coast of the Bahamas, where officials said four people died, and could bring as much as 40 inches of rain in some locations. If it didn't make landfall, Irma threatened to still wreak havoc on the Bahamas, the U.S. territory of Puerto Rico and the
