High Fidelity Audio Player is Java-based application for playing audio files. If you're a serious collector, chances are you are passionate about the industry and the stuff you collect. There's something to be said for choosing the right items

for your collection. Bam Margera believes his new film, 'Fear Of God,' is "probably one of the most real movies" he's ever made. The film follows the epic party-crashing antics of "Jackass" star and Bam Margera, but the new trailer for the film proves that it's far from a train-wreck. Bam posted a

new six-minute clip from the film on his YouTube page on Wednesday. The video shows a number of Margera's character's wild antics, including throwing a football and crashing a car. Margera says the film is "definitely" his funniest movie yet. He gives no indication of stopping when filming is finished.

"As long as the internet will have me, I will be in front of the camera doing that for as long as they will take my paycheck," Margera said. Margera's film is also a departure for his high-profile role on MTV's "Jackass." While Bam was once known for his seemingly endless supply of outrageous

stunts, he's been more in the news lately because of his battle with drug addiction. He's checked into rehab, and was even recently arrested for marijuana possession. "I can't comment on that," Margera said of his legal troubles. "All that stuff is in the past. You can't do anything about it anymore. I've learned to

not live in the past and never look back on my mistakes." 'Fear Of God' will be released on DVD this fall.

prevalence of pulmonary tuberculosis (PTB) has diminished in the United States, as evident by a slow decrease in the number of PTB cases reported from 2004 to 2014. Similar trends have been reported from other countries. These trends may be attributed to enhanced case finding, improved access

to diagnosis, and effective treatment, particularly for drug-susceptible strains. There is, however, a constant and recurring problem with reported cases of PTB diagnosed in the absence of bacteriologic confirmation. This includes the current situation of false-positive
