How did Photoshop become the popular image editing tool that it is today? Although Photoshop is a prominent name among amateur users, it's only been around for the last 20 years. This article will show you how to take your image editing skills to the next level with Photoshop. The History of Photoshop Adobe Photoshop began as a series of applications that were designed to solve a variety of image editing problems. Photoshop 1.0 was introduced in 1989 and used only bitmap images (not the high-resolution raster images that we all know Photoshop for today). In 1993 Photoshop 2.0 was released and introduced the first layer-based editing system. Since then Photoshop has been further enhanced to its current version of Photoshop CS6, which includes all features of the Creative Suite and most professional features of Photoshop that are not available in the Lightroom or Elements suite. Photoshop CS6 What's in the Creative Suite? The Photoshop Creative Suite is made up of four separate products: Adobe Photoshop, Adobe Photoshop Elements, Adobe Lightroom, and Adobe InDesign. Photoshop and Lightroom are available to purchase as a standalone package. InDesign is only available through its subscription-based Creative Cloud Service. Photoshop is still the premiere piece of the suite, as it is the essential application for creating and manipulating raster images. This application, along with the other applications in the suite, can take your creativity to new heights. The complete suite provides more than 35 tools for image editing, from simple tweaks to full-on retouching. Lightroom is a sort of "lite" version of Photoshop that's available for free and provides a lot of the tools needed for a RAW image workflow. The applications that make up the suite are not the only image editing applications available for Mac OS X. Apple includes their own Pages and iPhoto image editing applications in their operating system, and other image editing software is available through the Mac App Store. Photoshop Tutorials and Resources In order to learn the ins and outs of Photoshop, you must invest time into learning how to use the program. Below are some useful resources for all users, from beginners to experts. For more information about Photoshop, including tutorials and the latest features, check out the Adobe web site. Getting Started The best place to start learning how to use Photoshop is to get started with the FREE Lightroom, which can be downloaded through the Mac App Store.

Q: Weird behavior with Thread.sleep(long duration) Weird behavior of Thread.sleep(long duration) I was using a button press to start and stop a timed loop like below: Timer timer = new Timer(); timer.scheduleAtFixedRate(new TimerTask() { @Override public void run() { // do something } }, 0, 3000); That worked fine until I needed to stop the timer from main thread. Because java only allows one thread to run and the Timer is running as one thread, so I did below: timer.cancel(); timer.purge(); try { timer.wait(100); } catch (InterruptedException e) { e.printStackTrace(); } That works very well in stopping the Timer. But, the third parameter of Thread.sleep is long, so it's possible to sleep for a very long time. For example, when I was testing Timer, sometimes I press the button continuously, and when I stop pressing and release it, it would say that the timer was stopped but not really stop. It takes around 20-60s for it to stop. I'm wondering how to detect when it's really stopped. Thanks, A: The Timer is run by one thread and cancels that thread. After cancel, you have to invoke Timer.purge() which will exit the loop. If not, the loop will never stop. Once you do invoke Timer.purge(), you can't use Timer.wait(...) any more because it blocks until Timer.purge() returns. If it doesn't return in 100ms, you know it never will. If it does return before 100ms, you know it'll never return. I don't know if you want to use Timer.purge() or Timer.stop(). Timer.stop() can only be used once, to stop the Timer if you have to.

Former Celtics C Is There and Done Former Celtics C Is There and Done Shoulder muscle strain has ended the season for Daniel Gibson, the Celtics' second-round pick in the 2007 draft. Gibson is best known for being the player who drilled a three-pointer and got ejected in the final minute of Game 4 of the Celtics' Eastern Conference Semifinals series win over the Detroit Pistons. Gibson and center Marc Gasol, who goes by the nickname "The Grindfather," have very different paths in their respective careers. Gasol is a 30-year-old veteran whose body is starting to break down. Gibson is an 18-year-old rookie, whose body has barely hit puberty.World Cup of Hockey As the World Cup of Hockey draws ever closer, it's time to take a look at this edition of the tournament. The shootout has been the most controversial piece of the competition and its inability to properly tie scores has had a knock-on effect on the overall quality of the tournament. Nonetheless, the shootout has presented some interesting nuggets regarding this tournament. It's been another successful day of hockey at the world cup with Switzerland defeating Germany 4-2. This Switzerland win is their first in the tournament and gives them a 2-1 record, while Germany is still winless and sits on the brink of elimination. The gold medal game will start tomorrow with Russia, Finland, Sweden and Canada all going head to head. The tournament will be broadcasted on CBC starting at 1:30pm ET. Another day of intense hockey as Canada notched a 5-3 victory against the Czech Republic. With the win the Canadians improved their record to 3-1 while the Czechs fell to 0-4. Canada's 100th world cup win is also the most Canadian to qualify for a world cup. As expected, the gold medal game this year will be a rematch of last year's championship. Russia are currently on a 2-1 edge over Sweden while Finland leads Canada 3-1. As for the other quarterfinals, the United States and Austria are tied at 2-2 and Canada-Sweden, who won their previous two matchups, meet in a rematch at 5:30pm ET on Tuesday. The World Cup of Hockey has officially began with Canada destroying the Czech Republic 8-2. The game marks the first time that the Czechs have been defeated in a world cup
