There are also unique features like the ability to manipulate a photo using a cursor to add 'ghost' effects, and the Create Live Paint Bucket feature which enables you to add the painting effect to a photo live on the screen. ### **What's New In Photoshop 2021 (version 22)?**

In general, an image forming apparatus which includes a toner bottle is known. The toner bottle includes a bottle body storing toner and a toner outlet which is disposed at the lower end portion of the bottle body and discharges the toner inside the bottle body. Further, the toner outlet is equipped with a toner discharge hole to discharge the toner inside the bottle body from the toner discharge hole. Therefore, the toner inside the bottle body passes through the toner discharge hole and is discharged to the outside of the bottle body through the toner discharge hole. The toner (toner powder) discharged to the outside of the bottle body passes through the toner discharge hole and is stored in a toner

---

container. When the toner inside the toner bottle reaches a predetermined amount, the toner outlet is replaced with a new one. In the image forming apparatus, the toner inside the toner bottle is discharged to the outside of the toner bottle, and therefore, the toner may be discharged in an inappropriate order of color. Further, the toner discharged in the toner container cannot be precisely stored in the toner container. For example, when the toner inside the toner bottle is discharged, the color order of toner may be inverted. When the toner inside the toner bottle is discharged, the toner discharged in the toner container may be wasted. Therefore, it is desirable to provide an image forming apparatus capable of determining a predetermined amount of toner stored in the toner container and determining, based on this determination, the color order of the toner inside the toner bottle.
