
Simcity 4 Deluxe Plugin 1853604557

i have finally gotten around to compiling the dlc into the rul files. there are now 30 dlcs in the nam. most of them have been tested for a bit, but the debug plugin has not been tested. this is the first release of the nam with the dlcs. i will update the nam rul file as soon as i test the debug plugin, which is included in the rul file, but i do not know when that will be done. the nam is not compatible with the current rul files that simcity 4 deluxe 1.6: editor pack 1 and 1.6: world designer pack 1 includes, but i have been contacted by c raccoon and he has volunteered to fix this issue. i will update the nam as soon as the rul files are fixed. the '89 version of simcity 4 already gave players a fantastic playing field. but it was in the '90 version that players really began to see the true potential of what could be done with the transportation system. of course, this is where the modular nam plugins come in. some of those features are included in this release, while others have been modified slightly to fit the needs of the '90 version. some of the more obvious ones include the introduction of several types of street bridges and stages, the widening and lengthening of roads, and the first appearance of level-2 network overlays, such as the overpasses and t-intersections. more significant modifications include the addition of overpasses, street tunnels, and the opening of the construction center. this release also marks the first appearance of the unique park-and-recreation facility. the most significant of these additions, though, is the opening of the construction center. instead of requiring all of the development of an entire park to be completed before construction of a facility can be started, the construction center allows the player to begin building a park, and then add, change, or modify the park as he or she sees fit.
